

## Core Capabilities

---

### **Broadband & Infrastructure Advisory**

Feasibility studies, funding strategy (NTIA, BEAD, USDA, CPUC), regulatory alignment, and stakeholder coordination.

### **Project & Construction Management (PM/CM)**

Owner's representative services, QA/QC, contractor oversight, schedule & budget tracking, and permitting coordination.

### **Feasibility & Pre-Development**

Technical feasibility, cost modeling, deployment strategy, GIS alignment, and funding readiness documentation.

### **Regulatory & Compliance Advisory**

Support navigating federal funding requirements, audit risks, reporting structures, and agency coordination.

### **Workforce Development & Training**

Fiber optic certification programs, instructor training, mobile training labs, and workforce pipeline development.

### **Deployment & Field Support**

Technician augmentation, in-field support, installation readiness, and workforce alignment with active builds.

### **Strategic Partnerships & Ecosystem**

#### **Development**

Alignment with Tribal entities, state programs, OEMs, and infrastructure partners to deliver integrated solutions.

#### **Media & Communications**

Content development, storytelling, and program visibility to support initiatives and community engagement.
